The **Herjavec Group Threat Framework** is applied at the SIEM level to proactively identify attacks.

We apply a set of core and advanced use cases at the SIEM level to capture log data across the Threat Framework Targets.

- Authentication
- Targeted Attacks
- Malware
- DDOS
- Traffic Anomalies
- Suspicious Activity
- Policy Violations
- Operational Scenarios
- Behavior Analytics
- Advanced Scenarios

The Power of Analytics

6

automatic functions to limit manual processing:

- Cross Client Correlation
- Trending
- IP Reputation Scoring
- Anomaly Detection
- Aggregation
- De-duplication

What About Threat Intelligence?

We incorporate threat intel in **3** ways:

- 1 Localized Threat Intel feeds at the Client SIEM level
- 2 Global Threat Intel through our HG Analytics Platform
- 3 Threat Hunting Service proactive visibility & threat detection

Why Herjavec Group?

Information Security Is What We Do

100% focused on security & recognized as one of the world's most innovative cybersecurity players.

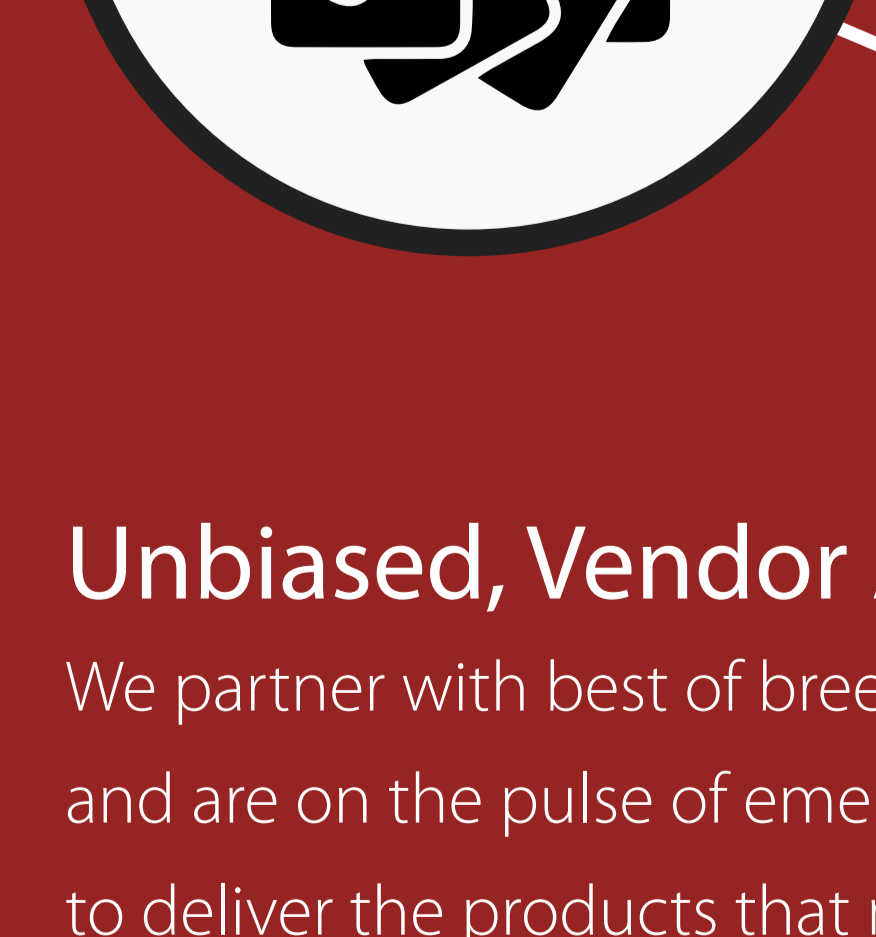

Expertise & Leadership In Comprehensive Security Services

Consulting, Delivery, Identity, Managed Security Services, Incident Response.

We Thrive In Complex, Multi Tech Environments

Our cyber experts support the world's largest banks, gaming companies and utility providers - offering customized and flexible solutions.

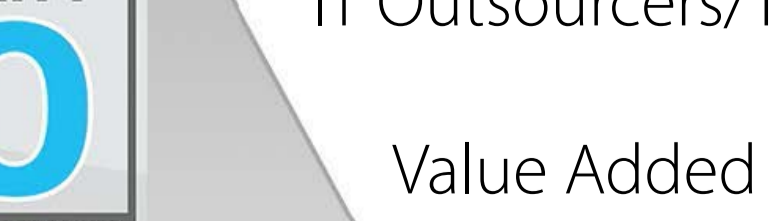

Unbiased, Vendor Agnostic Approach

We partner with best of breed technology providers and are on the pulse of emerging technology trends, to deliver the products that meet your needs.

"Herjavec Group's Analytics Platform and its incredible technical talent are solving the industry's greatest challenge - a severe cybersecurity labor shortage."
